

Muhammed Khaled Saleh

Front-End Web Developer | React.js & Next.js

Cairo, Egypt • Open to: Remote / Hybrid Roles

Phone: +20 010 0216 5352 • **Email:** muhammedkhaled25@gmail.com • **GitHub:** github.com/muhammedkhaled1996

• **LinkedIn:** [linkedin.com/in/muhammed-khaled-8a495b196](https://www.linkedin.com/in/muhammed-khaled-8a495b196) • **Portfolio :** muhammedcodex.vercel.app

PROFESSIONAL SUMMARY

- Analytical and detail-oriented Frontend Developer and former Military Engineer Officer with a strong foundation in architectural engineering, graduated with Highest Honors (Excellent with Honors) from the Military Technical College (MTC). Combines rigorous engineering problem-solving with modern web development skills, certified in Frontend Development (React.js & Next.js) from Route Academy (2026).
- Proven experience developing internal database management systems and engineering solutions using **SQL Server, MS Access (VBA), and Power BI**. Currently expanding into full-stack architecture with **Node.js, Express, and MongoDB**, specializing in high-performance UIs, data-driven dashboards, and clean software practices.

TECHNICAL SKILLS

- **Frontend Development:** React.js, Next.js (SSR / SSG / App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design.
- **State Management & Data Fetching:** Context API, React Query / TanStack Query, Axios, REST API Integration.
- **Backend & Databases (In Progress / Practical Experience):** Node.js, Express.js, MongoDB / Mongoose, SQL Server, MS Access (VBA), Relational Database Design & Queries.
- **Data Analytics & Tools:** Power BI (Dashboards), Data Modeling, Git & GitHub, Postman, Figma / Adobe Photoshop.
- **Core Competencies:** Problem Solving, System Architecture, Engineering Cost Estimation & Technical Office Automation, Leadership & Project Delivery under high-pressure environments.

PROFESSIONAL & ENGINEERING EXPERIENCE

Systems & Database Solutions Engineer | Engineering & Management Authority (2018 – Present)

- Built internal management systems using MS Access (VBA) and SQL Server to streamline multi-department operations.
- Automated BOQ and cost estimation, reducing report preparation time by 60% and eliminating calculation errors.
- Developed interactive Power BI dashboards to track project timelines, resource allocation, and key performance metrics.

Frontend Developer (React.js / Next.js) | Freelance / Self-Employed (2024 – Present)

- Developed responsive web applications using React.js, Next.js, and Tailwind CSS with modern UI architecture.
- Built fast client-facing platforms, including commercial stores and technical web tools, ensuring high performance and clean code.
- Integrated RESTful APIs and state management (Redux Toolkit / Context API) for seamless data flow and authentication.
- Turned UI/UX designs into pixel-perfect, mobile-first, and accessible interfaces.

Frontend Development Fellow / Trainee | Route Academy (2025 – 2026)

- Completed an intensive, hands-on professional program focused on modern frontend architecture, building over 8+ production-ready web applications.
 - Mastered core modern web technologies: JavaScript (ES6+), TypeScript, React.js (Hooks, Lifecycle, Performance Optimization), and Next.js (App Router, SSR, SSG).
 - Collaborated in team-based sprint projects simulating Agile/Scrum environments, conducting code reviews, and utilizing Git/GitHub for branching and version control.
-

KEY PROJECTS

- **Bonyan (بنيان) – Engineering Cost Estimation Platform** | Next.js, React, TypeScript, Tailwind CSS, SQL Server Built a web and desktop platform automating BOQ and cost analysis, cutting manual estimation time by 60% with dynamic Next.js App Router interfaces.
 - **Bella Fashion – E-Commerce Web App** | React.js, Redux Toolkit, Tailwind CSS, Cloudinary Developed a responsive apparel storefront with dynamic catalog filtering, centralized Redux cart state, and optimized image delivery.
 - **Nefert (نفرت) – Cosmetics Store & Admin Dashboard** | React.js, Context API, Firebase, Tailwind CSS Engineered a fast e-commerce platform with an admin portal for live inventory management, secure authentication, and real-time filtering.
 - **Social Media Web App** | Vue.js, RESTful APIs, Responsive CSS Engineered a responsive social networking platform featuring dynamic user feeds, post interactions, authentication, and state management using Vue.js.
 - **Engineering Projects Performance Dashboard** | Power BI, SQL Server, MS Access (VBA), DAX Designed an executive BI dashboard tracking site milestones, resource allocation, and key engineering KPIs via relational SQL models.
-

EDUCATION & CERTIFICATIONS

- **B.Sc. in Architectural Engineering** (Military Technical College (MTC) | 2013 – 2018)
 - **Professional Diploma in Frontend Web Development (React.js & Next.js)** (Route Academy | 2025 – 2026)
 - **Ongoing Professional Development** (Backend Web Development Track (Node.js, Express.js, MongoDB) | *In Progress*)
 - **Technical Skills & Tools Certifications** (SQL Server - MS Access VBA - PowerBi)
-

ACHIEVEMENTS

Graduated with **Highest Honors** from the Military Technical College (MTC).

- **Cut project estimation and BOQ reporting time by 60%** by deploying automated database solutions.
- **Developed and deployed 10+ web applications and interactive dashboards** using modern frontend frameworks and Power BI.
